DENER B-Servo 4013

Descrizione

Dener ball screw press brakes are flexible, reliable, and advanced bending machines without a hydraulic system, combining productivity, precision, flexibility, and reliability with an ecological perspective. The new concept offers low energy consumption, reduced maintenance, and does not require hydraulic oil for operation.

The ball screw press brake is equipped with an advanced CNC controller, a fast and precise clamping system for punch and die, and a fast and accurate multi-axis back gauge system.
